Frontend: Angular, TypeScript, SCSS, HTML, Backend: C#, .NET (Basic), Tools & Platforms: Git, Jira, Confluence, Figma, UiPath, Other: Unity (Game Development), Responsive Design, RPA

Education

Kütahya Dumlupınar University | Türkiye,Kütahya
Computer Engineering | 06/2025

Languages

Turkish: Native, English: B2–C1 (Upper Intermediate to Advanced), Azerbaijani: Fluent

Certificates

Hacker101 CTF: Completed 60 out of 75 flags

Projects

Projects
CMS Admin Panel
Developed an advanced content management interface enabling authorization, news creation, and listing features.
- GitHub: cms-app

CMS Public Interface
Built a user-facing interface displaying news content with multilingual support, sliders, and detailed view components.
- GitHub: cms-public

IME Frontend Internship Project
Designed and implemented key frontend features in a corporate internal project hosted on GitLab (restricted access).

E-commerce Frontend
Developed a responsive e-commerce web application using **React**, **TypeScript**, and **CSS**, featuring reusable components, state management, and optimized performance.
- GitHub: ecommerce-frontend

E-commerce Mobile

Built the mobile version of the e-commerce platform using **React Native**, integrating backend APIs and ensuring smooth navigation and performance.

- GitHub: ecommerce-mobile

E-commerce Backend

Implemented backend services using **.NET 8 (C#)**, featuring secure authentication, product/order management, and RESTful API endpoints.

- GitHub: ecommerce-backend

Unity Game Development

Created several game prototypes over a 2-year period, focusing on gameplay mechanics and user experience (UX) enhancement.
